📍 Periyakulam,Theni

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience in Flutter, Dart, mobile UI development, and API integration. Experienced in developing responsive mobile application interfaces and collaborating with backend teams using FastAPI, MySQL, and REST APIs. Worked on JSON request/response handling, authentication workflows, debugging, and backend integration. Strong problem-solving skills with practical exposure to frontend development, API integration, and application troubleshooting.

EDUCATION

MK University | 2022-2024

MCA

Arul Anandar College - Madurai

MK University | 2019-2022

B.Sc (C.S)

Theni Kammavar Sangam College Of Arts and Science-Theni

WORK EXPERIENCE

Retail Resonance LLp. | 2025 - 2026

Education Mobile App

- Developed and designed Flutter mobile application screens.
- Integrated FastAPI backend services with Flutter frontend.
- Worked on JSON request and response handling.
- Implemented login and authentication-related workflows.
- Debugged frontend and backend integration issues
- Collaborated on feature enhancements and issue fixing.

Sales & Distribution Backend API System

- Developed backend APIs using FastAPI and Python.
- Created JSON-based request and response structures for mobile and web applications.
- Worked with MySQL database integration using PyMySQL.
- Handled login authentication and validation workflows.
- Improved API response formatting and exception handling.
- Tested APIs using Postman.
- Maintained backend logs and debugging support.

API Deployment & Server Configuration

- Configured Nginx reverse proxy for FastAPI applications.
- Managed Python virtual environments and package dependencies.
- Resolved server startup and deployment issues.
- Debugged WebSocket and API routing issues.
- Monitored backend logs and runtime exceptions.
- Supported API hosting and server maintenance.

KYUNGSHIN INDUSTRIAL MOTHERSON PVT LTD. | 2025

IT Support Engineer

- Strong understanding of application installation and system communication between machines.
- Experienced in joining systems to a domain and managing Windows updates for smooth operations.
- Skilled in network configuration, troubleshooting, and connectivity management.
- Basic knowledge of electronic components, including segment Ips and standard Ips.
- Hands-on experience with hardware setup, maintenance, and software troubleshooting.
- Learning continuously to enhance skills in system administration and automation tools.

TECHNICAL SKILLS

Mobile Development : Flutter, API Integration, Responsive UI Design

Programming Languages : Python, Dart

Web Technologies : HTML, CSS, Bootstrap

Backend Development : FastAPI, JSON Handling, Authentication, Uvicorn

Database : MySQL, PostgreSQL, SQLite, Oracle SQL

Tools : Git, GitHub, Postman, VS Code, Android Studio

Auth & Security : JWT, OTP Authentication

PROJECT DETAILS

PG PROJECT : ACCIDENT DETECTION

Accidents are a leading cause of death in India, often due to delayed help rather than the accidents themselves. To address this, a system is proposed that uses CCTV video feeds from highways to detect accidents. By analyzing each video frame with a trained to classify frames as either accident or non-accident, the system aims to identify collisions quickly. CNNs, known for their speed and accuracy, have achieved over 95% accuracy with smaller datasets and require minimal pre-processing. CCTV-based accident detection systems can enhance response times by detecting collisions and notifying emergency services. This paper reviews the benefits and challenges of such systems and suggests solutions to improve road safety.
